Introduction

sunExt glass sliding systems are composed of sheets of tempered glass, heat-treated to increase their durability and last longer.

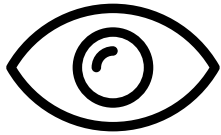

The leaves slide without folding horizontally through their lower rails. When you slide the first sheet, the following sheets will be pushed by the system's drag stops.

Characteristics

sunExt is a simple and elegant solution that combines versatility and functionality, allowing you to completely close or open a space.

Visibility

Easy cleaning

Quality guarantee

Space optimization

Protection against adverse weather conditions
